PSYC410/510

Evolutionary Psychology: Tue/Thur 4:00-5:20pm (McKenzie Hall 229)

Instructor: Dr. Azim Shariff
Office hours: Tuesdays: 5:35-7pm, or by appointment, in Straub 329
Email: shariff@uoregon.edu (please put “410” in the subject line)

TA: Leslie Roos
Office hours: Fridays: 8-10am, in LISB 436
Email: lroos@uoregon.edu (please put “410” in the subject line)

Class Format: In order to facilitate active participation, classes will alternate between Lecture Classes and Discussion Classes. For each topic, we’ll start with a Lecture Class, in which I’ll introduce the topic and the assigned readings (which will all be available online). The following class will be devoted to discussion of various aspects and controversies relating to the topic. I will lead the discussion, but will base it on the Discussion Questions that you generate (see Assignments and Evaluation)

Assignments and Evaluation:

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Discussion Question/Analysis Paper</td>
<td>15%*</td>
</tr>
<tr>
<td>Discussion Participation</td>
<td>15%</td>
</tr>
<tr>
<td>Midterm Exam</td>
<td>20%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>25%</td>
</tr>
<tr>
<td>Term Paper</td>
<td>25%*</td>
</tr>
</tbody>
</table>

* No late assignments will be accepted without medical documentation. This is for your own good. The temptation to ‘buy’ more time with late penalties too often leads to the unnecessary hemorrhaging of grades.

Discussion Question/Analysis Paper: Each student will sign up to prepare a two-page analysis paper of a question of their choosing relating to the week’s lecture/reading topic.

This paper should be submitted via safeassign on blackboard no later than midnight on the Saturday preceding a Tuesday discussion class, or, in the second half of term, the Tuesday preceding a Thursday discussion class. The questions discussed in these papers will then form the basis of the Discussion Class.

You may sign up at http://tinyurl.com/topic-signup (max 8 students per topic).

Please sign up before next class as the 1st papers are due this Saturday, Apr 6th

You can see examples of graded papers on the Blackboard’s “course documents.”

These analysis papers will be graded as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Suitability of Question for Discussion</td>
<td>5%</td>
</tr>
<tr>
<td>Knowledge of Material</td>
<td>5%</td>
</tr>
<tr>
<td>Sophistication of Analysis</td>
<td>5%</td>
</tr>
<tr>
<td>Total</td>
<td>15% of final grade</td>
</tr>
</tbody>
</table>
**Discussion Participation:** A key focus of the class will be active discussion of controversies within the field of evolutionary psychology. As a result, you will all have ample opportunity to actively participate in the class discussions. Engaging with these discussions will form a not insignificant **15% of final grade.**

**Term Paper:** The term paper will be a concise but in-depth treatment of a problem within evolutionary psychology that bridges at least two of the topics covered in class. The best papers will involve a review and evaluation of the current empirical and theoretical literature on the relevant topics, and an original contribution to the issue, either via a reframing of the theory, a unique marriage of disparate topics, a compelling critical challenge to existing positions, or a well-thought out proposal for a new empirical investigation of an unresolved issue. 10 pages (double-spaced) Grading of the paper will be broken down as follows:

- Breadth and understanding of existing research: 10%
- Insightfulness of original contribution: 10%
- Engagingness, style and composition: 5%

**Total: 25% of final grade**

**Midterm & Final Exam:** The midterm will consist solely of multiple-choice questions, while the final will add some open response questions. They will cover material from the readings, the class lectures and the discussions, and the final will be cumulative. **Midterm (May 2\textsuperscript{nd}): 20%. Final (June 12\textsuperscript{th}): 25%**

**Experimental credits:** One of the best ways of learning about how psychological research is conducted is for students to participate in psych experiments themselves. You will have the opportunity to earn up to 2% on top of your grade for participating in two hours worth of experiment through the Psychology Research Participant Pool [https://uopsycho.sona-systems.com/](https://uopsycho.sona-systems.com/). Alternatively, you can also earn these 2% by completing a methodological critique of a recent (2010-2013) empirical paper from the journal *Evolution and Human Behavior*. **2% bonus.**

**Disability Services:** The University of Oregon is working to create inclusive learning environments. If there are aspects of the instruction or design of this course that result in disability related barriers to your participation, please notify me as soon as possible. You may also wish to contact Disability Services in 164 Oregon Hall, at 346-1155, or disabrsrv@uoregon.edu

**Academic Misconduct:** If you knowingly engage in academic misconduct, you are not only cheating your fellow students, but missing the point of a college education. And if you get caught, you’ll get a 0 on the assignment or test, and possibly face more severe punishment. Please inform yourself about the student conduct code [http://conduct.uoregon.edu](http://conduct.uoregon.edu) and about plagiarism, a particularly common form of misconduct [http://www.libweb.uoregon.edu/guides/plagiarism/students](http://www.libweb.uoregon.edu/guides/plagiarism/students)
**Class Schedule & Readings**

(readings are also all available as clickable downloads from the page linked in Course Documents on Blackboard)
