Information for Students with Prior Graduate Coursework and University of Oregon Coursework Substitutions:

Master's Degree credit is determined by the Department (via the student's three-member advising committee and the Graduate Education Committee). The basis for this determination is that the student has completed a research thesis based upon empirical data which meets Departmental standards for scholarly content and ethical guidelines. If this is successfully negotiated, the First Year Research Practicum can be waived.

Waivers of other course requirements should be discussed with the Director of Clinical Training. Students should prepare a short statement requesting the waiver and evidence of equivalent coverage. Information essential for determining the applicability of the prior coursework includes course syllabi, reading materials used, assignments, grading system, and overall level of sophistication of the course structure and content. Most often, the faculty member teaching the particular course in the Department also will judge the suitability of the prior course for the objectives of the Departmental or Clinical Program requirement. For all waivers of Departmental requirements, the Graduate Education Committee must make a final approval; for all waivers of Clinical Program requirements, the Clinical Faculty must make a final approval. Petitions for waivers must be submitted in writing, with places for endorsement by the Director of Clinical Training, by the person in charge of the course requested to be waived, and by the person from the appropriate final decision committee (i.e., the Director of the Clinical Program or the Chair of the Graduate Education Committee). The waiver must be included in the student's file.

On other occasions, a student might elect to take courses elsewhere in the University that have obvious relevance for required clinical courses (e.g., an assessment or therapy course offered by another department). Under these conditions, the student should petition the clinical faculty to formally approve the substitution and it should be entered into his or her file.

Receiving a course waiver will not guarantee a reduction in the amount of time toward the PhD.
